

PERSPEX® FLUORESCENT ANTI-REFLECTIVE

PERSPEX®
FROM LUCITE®

Striking fluorescent edge with a soft sheer finish

Part of the innovative range of Perspex® from Lucite® solutions, Perspex® Fluorescent Anti-Reflective has a fluorescent edge effect and a double sided textured surface. It is ideal for a range of indoor POP/POS, architectural, design and display applications – from signs to shelving, from window displays to interior design.

Superb features

- Translucent
- Exciting live edge effect
- Sheer effect (Anti-Reflective)
- Vibrant and modern colours
- Ideal for POP, Retail, Interior displays or signs

An added advantage of having Perspex® Fluorescent Anti-Reflective is the soft sheer surface texture on both sides of the sheet, punctuated by the striking fluorescent edge effect to give endless possibilities.

LUCITE®
The source of inspiration

Perspex® and Lucite® are registered Trade Marks of the Lucite International Group of Companies. We recommend Perspex® Fluorescent Anti-Reflective (AR) for indoor application only. Colours will fade over time with exposure to strong UV light. Samples are as photographic representation and may not accurately show transmitted colours.
